Cum ipse autem intelligibilibus et cetera

quod quo sit scientia probatur quia primo de anima quod omnes sciencie sunt honorande quas sunt igitur quo scientia
scientias patet quia multi scientes sunt viciosi et mali et tales non sunt honorandi
sed quia primo quia primo bonum omnis scientia est honorabilis et sed omnis sciens sed sciens igitur op-
sciens est honorabilis vel de numero et quia tamen in ... in barbara sed que est sum
vel scientia est igitur aliqua persuasio in bonis et ad oppositum quod quo igitur quo scientia et

in oppositum est illa quibus bonorum honorabilium et et probatur ratione quia omnis virtus est honorabilis sed omnis
scientia est quedam virtus igitur omnis scientia est honorabilis consequentia tenet in barbara antecedens declaratur primo
ethicorum vel dicit quod virtutes est laudis et cetera et dicit quod virtute laudamus propter operationem
igitur quo verum

Ad declarandum huius questionem ita primo ponam quod nobilia tamen in quadam
positos declarandi secundo ponam conclusiones ad casum correlarium tertio
respondendo ad rationes quesitum quod sit totum. Circa primum

Primo igitur noto quod triplex est bonum quoddam bonum honorabile et quod et quando aliquid distantie
rete bonum est appetendum propter se ita quod adhuc appetere quamvis
in aliud non ordinetur aliud est bonum delectabile et est appetibile tanquam
quietem appetitui vel appetenti. aliud est bonum utile et est appetibile
propter aliud melius sicut est potio. Secundo noto quod ista tria bona
honorabile delectabile et utile in re non distinguntur sed in solo ratione
primum patet quia posita eadem ponuntur eadem res supponunt quod vere eadem res
in uno est bonum honorabile delectabile et utile. Secundum patet quia bonum secundum
aliam rationem dicitur honorabile et secundum aliam delectabile et secundum aliam utile
ut patet in nobili potentia. Tertio noto dupliciter aliquid potest dici honorabile
secundo modo propter aliquid id cui debetur honor et reverentia et sic homo iustus et sacer-
dos est honorabilis et iste dicitur primo ethicorum honor est exhibitio reverentie
in signum virtutis. Secundo aliquid dicitur honorabile impropie et est id cui non debetur
reverentia sed alicui alteri ratione sui et sic scientia est honorabilis quia ratione sui
homini sciendo debetur reverentia

Quantum ad secundum sit prima conclusio ita nulla scientia est honorabilis vel de numero bonorum
honorabilium capiendo propie sicut capitur in honorabile primum quod est honorabile vel de numero
bonorum honorabilium est debetur honor et reverentia sed nulli scientie debetur honor
et reverentia igitur nulla scientia est honorabilis consequentia tenet in Camestres antecedens patet de se
et secundum clarum est per notabile tertio. Correlarium viri bene scientie inter se
honorandi patet per conclusionem et ratione patet quia viri bene scientia indutia
ratificant discordias pellunt bonum augmentant et viam summe acquirendi
felicitatem viam ostendunt

Conclusio secunda omnis scientia est honorabilis vel de numero bonorum honorabilium capiendo impropie
sicut capitur in honorabile primum quia propter quamlibet homini debetur honor et reverentia
id est honorabile vel de numero bonorum honorabilium sed propter omnes scientias homini debetur
honor et reverentia igitur omnis scientia honorabilis consequentia tenet in Barbara et antecedens non est
de se sed secundum patet per notabile tertio. Correlarium diligentissime scientie sunt acquirenda
patet per conclusionem et ratione patet quia scientie tenebras ignorantie expellunt

cogitacionem intellectus conducit in maximos ad honores promovet et ad consilium
regum et principum perducit

Conclusio 3a quod sciencia est bonum delectabile et utile. prima pars patet quia delectatio sequitur
delectat hoc est bonum delectabile. Secunda quod sciencia sequitur certa delectatio [illegible] quod
sciencia est bonum delectabile quia [illegible] in Barbara. antecedens patet [illegible] Secunda pars quod
[illegible] methaphisice dicit Omnes homines natura scire desiderant
[illegible] delectari et summo [illegible] inquantum
[illegible] quod sciencia [illegible] ut est perfecta ut
[illegible] tunc est utilis
ad contemplandum [illegible] Contra [illegible] scientiarum
per scienciam [illegible] delectamur. patet quia [illegible] conclusiones [illegible] quia [illegible]
[illegible] est [illegible] sciencias delectari [illegible] oppositi
Contra [illegible] sacrificium est valde utile patet quia [illegible]
et [illegible] est inutile Ergo [illegible] sacrificium est valde
utile [illegible] oppositi Contra [illegible] responsale ad quorum est [illegible]
[illegible] est plus distinguenda quam simpliciter concedenda ut [illegible]

[illegible] respondendo ad rationes. [illegible] arguit
[illegible] scientias [illegible] debent honorari [illegible]
[illegible] rationes [illegible] debet [illegible]
